

CÚRAM EDUCATION TEAM – TRAINING SERVICES ABSTRACT

Mentoring Program for Cúram Business Analyst Certification

CÚRAM BUSINESS ANALYST CERTIFICATION PREPARATION

Description

Business Analysts (BAs) who want to work on Cúram implementation projects can enhance their professional value by earning the following credential:

- C003 – Cúram V8.X Business Analysis – Certification

The credential is based on the knowledge and skills taught in the following course:

- CUR088: Fundamentals of the Merative Cúram Platform for Business Analysts 8.X

A well-prepared test candidate needs a strong grasp of key BA concepts and hands-on experience of using the Cúram application. During preparation, learners encounter questions, conceptual challenges, and practical issues while trying to make the most of limited study time.

The *Mentoring Program for Cúram Business Analyst Certification* offers expert guidance from experienced Cúram trainers, interactive question and answer activities, and targeted instruction based on learner readiness, feedback and individual needs. The program aims to reduce learner anxiety; improve learner confidence; and provide additional support for critical areas and key concepts, ultimately leading to improved Certification Test success rates.

General Information

Delivery Method: Remote Instructor-Led.

Audience: This program is designed for BAs and other functional staff who need to prepare for Cúram Business Analyst Certification. It is suitable for groups of up to 10 candidates.

Topics: The program focuses on the following activities:

- Effective preparation strategies for the tests.
- Interactive review sessions to reinforce key concepts, answer questions, and check candidate readiness.
- Targeted feedback and support based on individual learner needs.

Prerequisites: Participants must have completed the relevant training course associated with the test.
