

CÚRAM EDUCATION TEAM – TRAINING SERVICES ABSTRACT

Mentoring Program for Cúram Developer Accreditation and Certification

CÚRAM DEVELOPER CERTIFICATION PREPARATION

Description

Developers who want to work on Cúram implementation projects can enhance their professional value by earning the following credentials:

- C004 – Cúram for Developers (ADE) Accreditation
- C005 – Cúram for Developers (Customization) Certification

The credentials are based on the knowledge and skills taught in the following courses:

- CUR090 – Merative Cúram for Developers (ADE)
- CUR091 – Merative Cúram for Developers (Customization)

A well-prepared test candidate needs a strong grasp of key developer concepts and extensive hands-on practice of Cúram development tasks. During preparation, learners encounter questions, conceptual challenges, and practical issues while trying to make the most of limited study time.

The *Mentoring Program for Cúram Developer Accreditation and Certification* offers expert guidance from experienced Cúram trainers, interactive question and answer activities, and targeted instruction based on learner readiness, feedback and individual needs. The program aims to reduce learner anxiety; improve learner confidence; and provide additional support for critical areas and key concepts, leading to improved Certification Test success rates.

General Information

Delivery Method: Remote Instructor-Led.

Audience: This program is designed for developers preparing for Cúram Developer Accreditation and Certification respectively. It is ideal for groups of up to 15 candidates.

Topics: The program focuses on the following activities:

- Effective preparation strategies for the tests.

- Interactive review sessions to reinforce key concepts, answer questions, and check candidate readiness.
- Targeted feedback and support based on individual learner needs.

Prerequisites: Participants must have completed the relevant training course associated with the test.

Training Course	Test
<ul style="list-style-type: none"> • CUR090 – Merative Cúram for Developers (ADE) 	<ul style="list-style-type: none"> • C004 – Cúram for Developers (ADE) Accreditation
<ul style="list-style-type: none"> • CUR091 – Merative Cúram for Developers (Customization) 	<ul style="list-style-type: none"> • C005 – Cúram for Developers (Customization) Certification

Duration: 6 hours (3 hours per exam preparation).

Agenda

The following table shows an example of how the program can be structured for Accreditation preparation:

Agenda		Note: This agenda can be adapted to suit the experience levels of learners, their rates of progress, and when they expect to attempt the tests.		
Session	Test	What candidates complete before the session	What will be covered in the session	Duration
1	C004	<ul style="list-style-type: none"> • Complete course CUR090. 	<ul style="list-style-type: none"> • Review the test objectives. • Describe preparation resources and how to maximize 	00:30
2	C004	<ul style="list-style-type: none"> • Study course materials, practice hands-on tasks, and prepare questions. 	<ul style="list-style-type: none"> • Answer questions and review important topics. • Ask questions to check candidate readiness. 	01:15
3	C004	<ul style="list-style-type: none"> • Take the Knowledge Assessment (CUR090_KA) and practice test (P004). • Prepare questions for the mentor. 	<ul style="list-style-type: none"> • Answer questions and review important topics. • Ask questions to check candidate readiness. 	01:15
-	C004	<ul style="list-style-type: none"> • Take the full (C004) test. 	-	-
				03:00
